

LXPO71611-7/16/69-SPACE CENTER, HOUSTON: In an unscheduled telecast from space, Apollo 11 broadcast this view of the Earth back to Earth-bound viewers as it sped toward the moon at a distance of 58,600 miles from Earth. The North Pole is toward the left of the globe. The terminator, the line between daylight and dark is at top. UPI TELEPHOTO jam
CAPTION AT TOP WHEN PROPERLY VIEWED
