

SILVER SPUR AT HADLEY DELTA AS VIEWED FROM APOLLO 15 LM.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

APOLLO 15 EVA PHOTO—A view of Hadley Delta, looking southeasterly, as photographed from the top hatch of the Apollo 15 Lunar Module by Astronaut David R. Scott during his stand-up extravehicular activity just after the LM "Falcon" touched down at the Hadley-Apennine Landing site. The prominent feature on the horizon in the center of the picture was called Silver Spur by the Apollo 15 crewmen. Hadley Delta mountain rises approximately 4,000 meters (about 13,124 feet) above the plain.
