

APOLLO 15 CSM & SIM BAY VIEWED FROM LM DURING RENDEZVOUS.

## NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

APOLLO 15 CSM FROM LM—An excellent view of the Apollo 15 Command and Service Modules in lunar orbit as photographed from the Lunar Module, with the lunar nearside in background. This view is looking southeast into the Sea of Fertility. The crater Tarantius is at the right center edge of the picture. The SM's Scientific Instrument Module (SIM) bay, which holds eight orbital science experiments, is clearly visible. While Astronauts David R. Scott and James B. Irwin descended in the LM to explore the Moon, Astronaut Alfred M. Worden remained with the CSM in lunar orbit.
