

APOLLO 11

A SERIES OF 5

From Authentic N.A.S.A. Transparencies

Lunar Module

Preparing to touch down on the moon after a journey of approximately 240,000 miles, lasting 70 hours, the Lunar Module will be captained by Neil Armstrong, a civilian who is destined to be the "First Man on the Moon." The Lunar Module will have separated from the Command Service Module about 30 minutes previously and will be piloted by U.S.A.F. Col. Edwin Aldrin, and he will be the "Second Man on the Moon" This picture shows "Snoopy" on the Apollo 10 mission
